

Masters of Applied Philosophy and Ethics

Strathmore University

**School of Humanities and
Social Sciences**

INTRODUCTION

The Masters in Applied Philosophy and Ethics is designed to provide an overview of the role of a manager or leader in shaping the ethics of an organization. It also provides a theoretical foundation in philosophy through which each individual can apply the ethical principles to personal and professional situations.

Through a background of Philosophy, students are able to use what they have learnt to create and sustain an ethical organizational culture with a clear understanding of the nature of ethics, and the role ethics plays in business. This not only enables them to solve the most commonly encountered ethical dilemmas faced in an organization or company but provides practical advice on the general strategies for managing ethics with philosophical tools used in shaping the ethical culture of a team, work group or organization.

Student Testimonial

"I chose MAPE because I was able to diversify my knowledge from Dentistry to Philosophy. I was able to enhance my relationships with people from different walks of life. The student experience was quite interesting because we had international faculty from all over the globe who were accomplished in their various fields of specializations. Personally, I also learnt to create a balance in my professional and family life as a result of studying MAPE.

***Dr Charles Amulega,**
Dentist MAPE Alumnus*

WHO IT IS FOR?

Policy makers like politicians, government officers, lawyers, doctors, military and security professionals, development officers, program directors, human resource personnel and psychologists who are interested in the development of the human areas of their profession; and any professional interested in philosophy or ethics.
